About PKF Audit (WA) Pty Ltd

All businesses can benefit from an independent, external review. Often viewed as a compliance measure, a robust and risk based audit can provide a huge amount of value to a business, highlight areas of concern or new risks to consider.

All audits are not the same, and to experience an audit that delivers real value you need auditors who can look beyond the technical to understand the commercial implications of your activities and their associated risks.

PKF Audit (WA) Pty Ltd is a well-regarded Audit and Assurance solution, servicing the Western Australian business community from our centrally located offices in the 'parliamentary precinct' of West Perth at the western end of the Perth CBD.

Lead by Simon Fermanis, our team of highly experienced professionals is well credentialed and has the right skills and experience to conduct your audit in an efficient manner and provide practical, commercial outcomes. Our pragmatic and objective advice will help you to understand and respond to the risk your business faces in an increasingly complex business environment.

We have substantial capability in servicing the financial services industry and also specialise in providing audit and assurance services to the following sectors:

- Energy and Resources
- Not for Profit
- Aged Care
- Manufacturing and Engineering
- Local Government (WALGA Preferred Audit Supplier Panel member).

Our audits are highly personalised, and focus heavily on continued communication throughout the process. Each audit is led by a Partner, who will remain involved throughout the audit. Our partners are supported by teams who not only have the technical capabilities but also have significant business experience.

With every audit engagement we look closely at your business as a whole and tailor our audit procedures to the areas of operation, compliance and risk. At the conclusion of your audit you will receive a Management Report that details commercially focussed recommendations in relation to your systems and processes that allow you to be in the best possible position to make informed decisions about your business.

Our risk based audit approach has been developed through the PKF International association and is based on international auditing standards and legislated Australian requirements.

To discuss how we can provide you with high quality audit and assurance services please do not hesitate to contact one of the team:
